Anvil Edtech

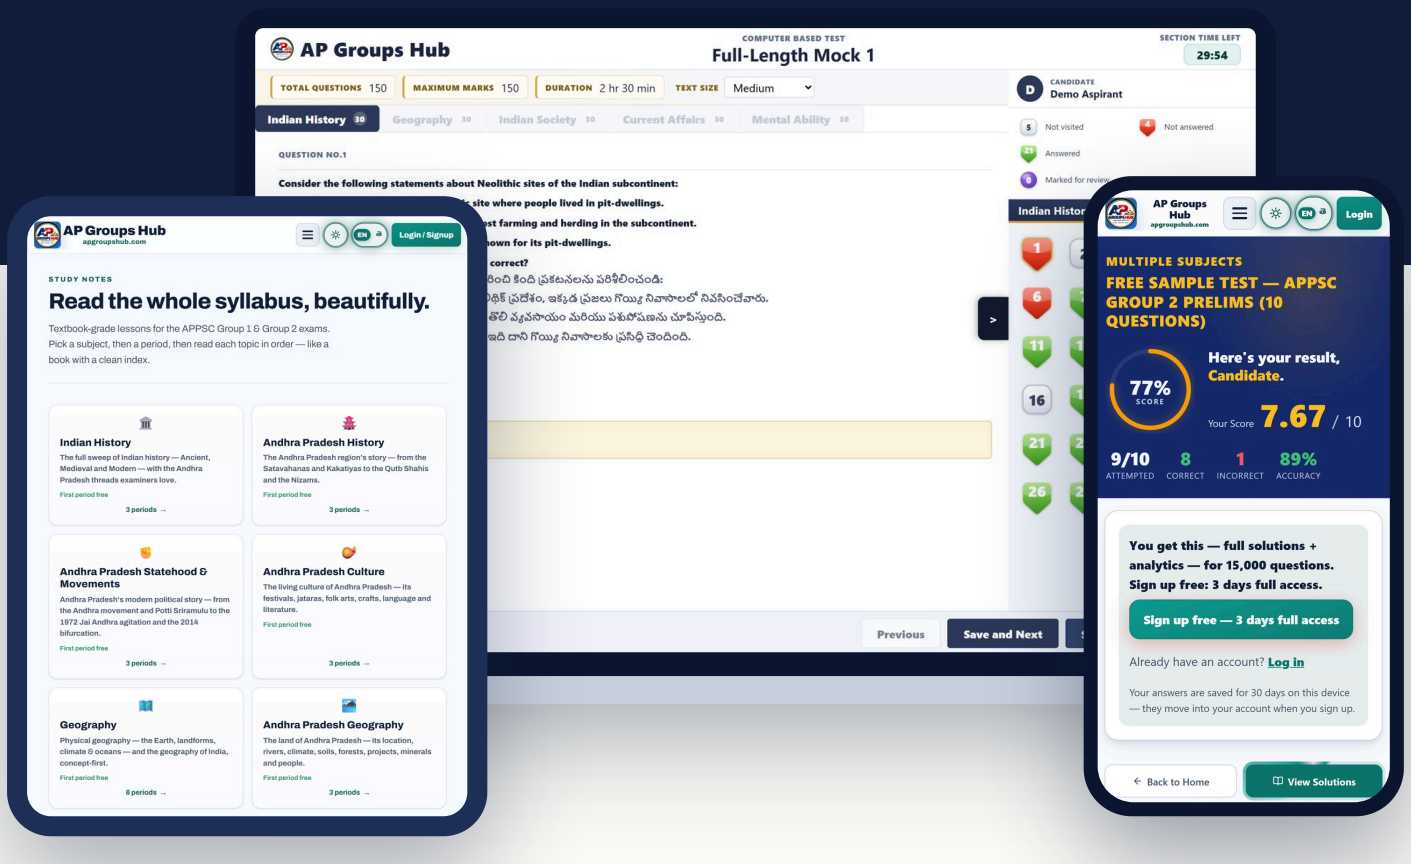

PLATFORM BROCHURE · 2026

FOR COACHING INSTITUTES · TEACHERS · ACADEMIES · ACROSS INDIA

Your complete learning platform. Website + Android app, under your brand.

Tests, video lessons, live classes, notes and previous papers in one place. The engine behind AP Groups Hub, AP Police Hub and TS Police Hub.

Desktop | Tablet | Phone & Android app

Mock tests & test series

Video lessons & live classes

Notes & previous papers

Android app, admin & marketing

ABOUT US

We build and run exam-prep platforms, not just websites.

Anvil Edtech Private Limited is a Hyderabad-based education technology company. We design, build and operate focused learning platforms that are mapped to the official exam pattern and offered in the language students actually study in. Everything we offer you, we already run every day for our own students.

REGISTERED COMPANY
Anvil Edtech Private Limited
CIN U85499TS2026PTC221008

MSME REGISTERED
UDYAM-TS-20-0208982
Incorporated 2026

BASED IN
Hyderabad, Telangana
Serving coaching institutes across India

LANGUAGES
English + any language
Telugu, Hindi, Tamil, Kannada, Marathi and more, on every screen and question

Platforms we run today

AP Groups Hub · LIVE
APPSC Group 1 & Group 2: mock tests, previous papers, notes, dated test series. Web + Android.
apgroupshub.com

TS Police Hub · LIVE
Telangana SI & Constable: bilingual mock tests, solved papers, notes, physical-training help, live ranks.
tspolicehub.com

AP Police Hub · LIVE
Andhra Pradesh SI & Constable: bilingual mock tests, previous-year papers, notes and live ranks.
appolicehub.com

Vidyalaya · COMING SOON
One platform a school runs on: attendance, timetables, homework, exams, gradebooks, report cards.

Our expertise

Exam engineering
Computer-based tests that match the real exam pattern and marking.

Question banks
Thousands of bilingual questions, tagged by subject, chapter and topic.

Web & Android
One codebase for the website and the Play Store app.

Content
Notes, solutions and previous papers written for aspirants.

Growth marketing
Meta and Google ads, lead forms, social media, analytics.

Operations
Hosting, backups, payments and student support.

WHAT WE BUILD FOR YOU

A complete learning platform, custom-built for your coaching institute.

Your own website and Play Store app, designed in your brand with the features you ask for. It is built on our tested, fast foundation, and our team maintains and changes it for you every day.

01

Branded student website

On your own domain. Exam pages, test series, results, notes, previous papers and online payments.

02

Android app on Play Store

Published under your name, same login as the website, with instant updates without waiting for store review.

03

Admin panel

Upload questions, build tests, set timing and marking, release tests, see students, sign-ups and revenue.

04

Content setup

We digitise your question bank, tag it by subject and topic, add solutions, and load previous papers and notes.

05

Marketing & growth setup

Meta Pixel, Google Ads tracking, lead-form ads, analytics, search-engine pages and social media content.

06

Daily care, 24×7

Hosting, nightly backups, upgrades and changes you ask for every day, with support around the clock, so your team only focuses on teaching.

INCLUDED

Video lessons & live classes

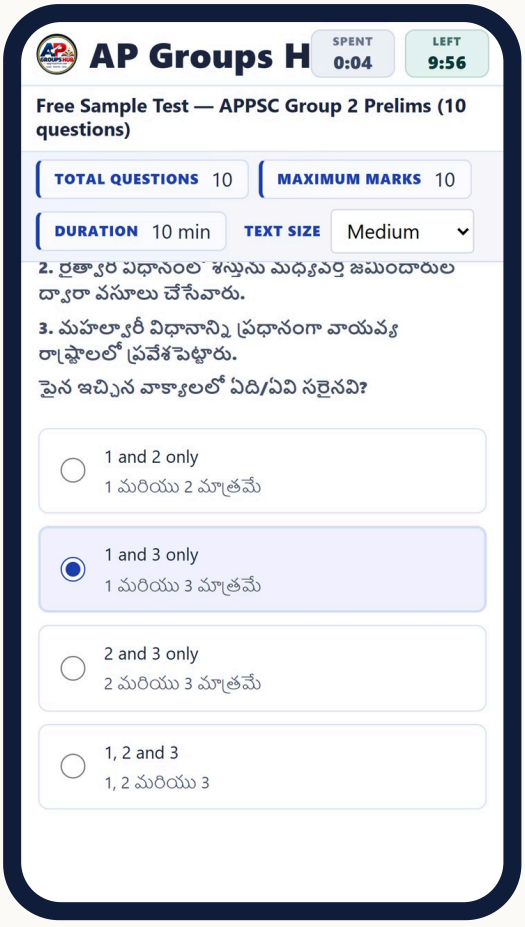

Recorded video courses and scheduled live classes with a join button and recordings afterwards, on the same student accounts and passes. Not just exam prep: a complete place to learn.

Who it is for

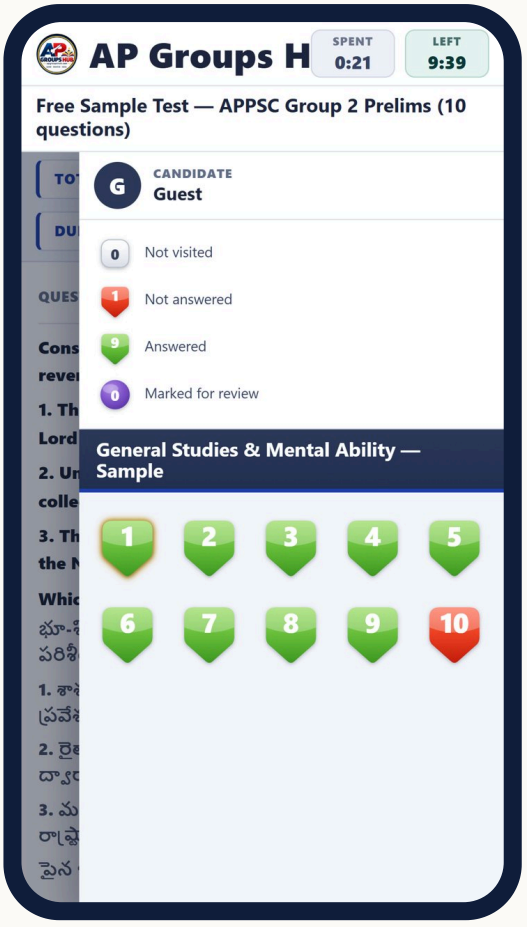

Coaching institutes · Independent teachers · Exam academies · APPSC · TSPSC

THE EXAM SCREEN

Students practise on the screen they will face on exam day.

Question in English & Telugu, timer on top

Question palette, exactly like the real CBT

Real exam layout
Subject tabs, overall and section timers, question palette, mark for review, save and next, skip section.

Two languages side by side
English plus your students' language (Telugu, Hindi, Tamil or any other), with a language switch and adjustable text size.

Official-style instructions
Two-page instructions with a declaration the student must accept before starting.

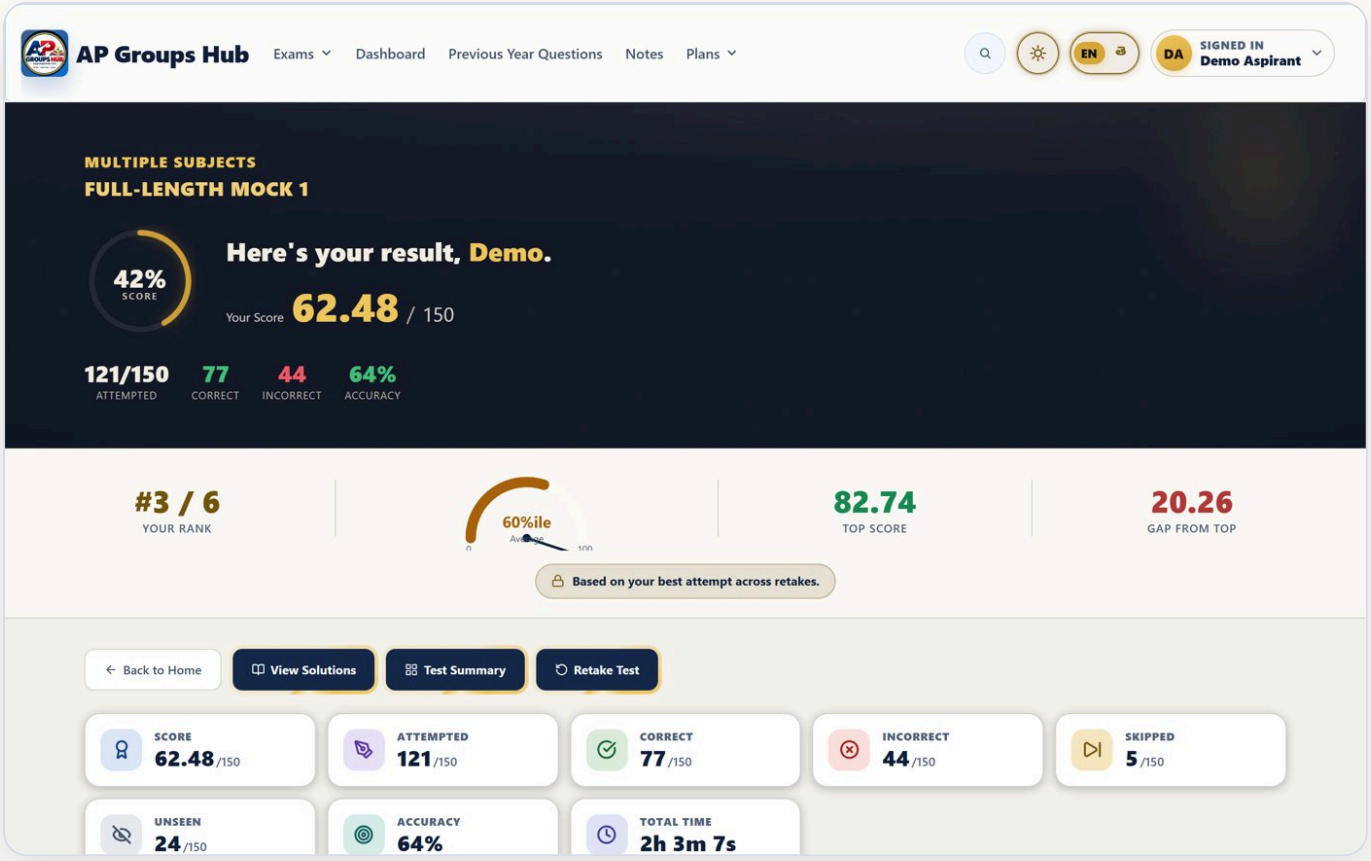

Your marking scheme
Marks and negative marking set per test or per section, shown clearly on the instructions page.

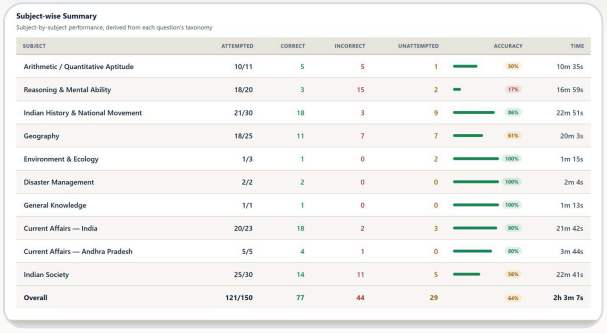

No lost answers
Answers are saved continuously and sent before the timer ends, even if the network drops or the tab closes.

Free test, no sign-up
Visitors try a sample test first, then sign up to keep their result. A proven way to win new students.

RESULTS & ANALYTICS

Every test tells the student exactly where they stand.

Subject-wise Summary

Subject-by-subject performance, derived from each question's taxonomy

SUBJECT	ATTEMPTED	CORRECT	INCORRECT	UNATTEMPTED	ACCURACY	TIME
Arithmetic / Quantitative Aptitude	10/11	5	5	1	50%	10m 35s
Reasoning & Mental Ability	18/20	3	15	2	17%	16m 59s
Indian History & National Movement	21/30	18	3	9	86%	22m 51s
Geography	18/25	11	7	7	61%	20m 3s
Environment & Ecology	1/3	1	0	2	100%	1m 15s
Disaster Management	2/2	2	0	0	100%	2m 4s
General Knowledge	1/1	1	0	0	100%	1m 13s
Current Affairs — India	20/23	18	2	3	90%	21m 42s
Current Affairs — Andhra Pradesh	5/5	4	1	0	80%	3m 44s
Indian Society	25/30	14	11	5	56%	22m 41s
Overall	121/150	77	44	29	64%	2h 3m 7s

Topic-by-topic analysis after each test.

Score, rank and percentile

Correct, wrong, skipped, accuracy, time taken, rank among all takers, top score and gap from the top.

Strengths and weak topics

Subject- and topic-wise accuracy, speed and difficulty, so students know what to revise next.

Fair ranking on retakes

You choose: rank on first, best or latest attempt, or no ranking. Retake improvement is tracked.

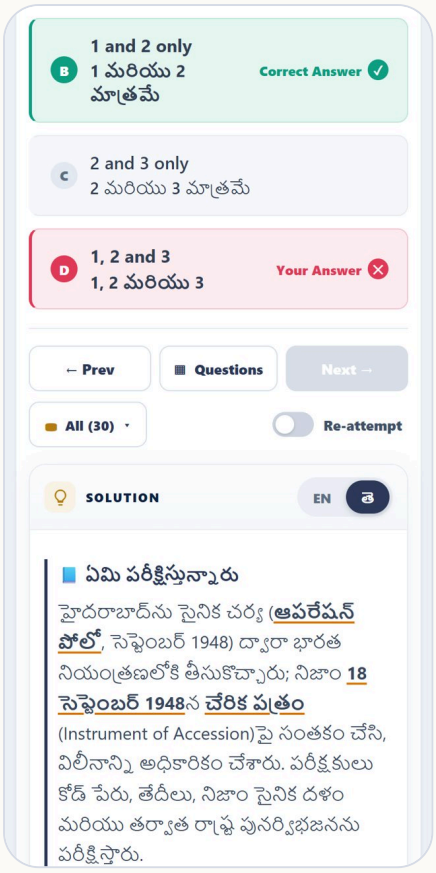

Top-10 board per test

Motivation without exposing other students' private data.

Scores are calculated on our server, never in the student's browser, so results cannot be tampered with and ranks stay trustworthy.

SOLUTIONS, NOTES & PREVIOUS PAPERS

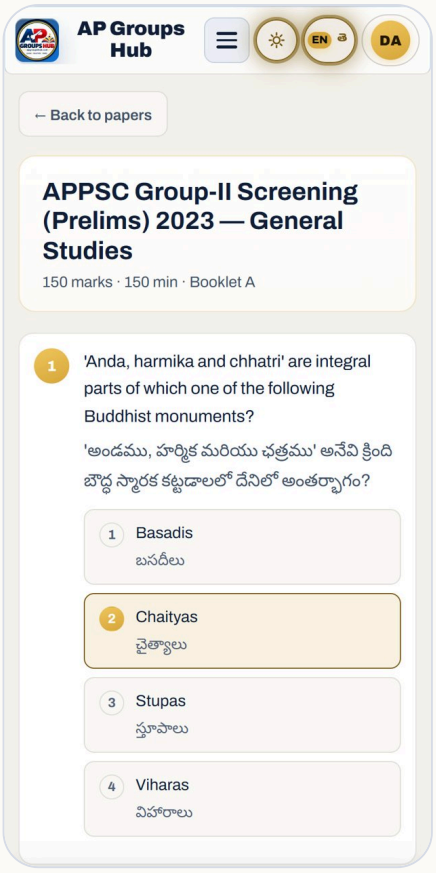

Practice that teaches, not just tests.

Full solution after every question

Study notes in English & your language

Previous papers as real timed tests

One renderer for everything

Maths formulas, tables, bar, line, pie and radar charts, images, diagrams and reading passages, in questions and solutions alike.

Beginner to Expert tracks

Step-by-step practice for new students; chapter tests and full mocks for prepared ones.

Dated test series

Run an institute-style calendar: each test opens on its date, with its syllabus shown in advance.

Notes linked to tests

Weak topic in a result? One tap opens the matching lesson.

548
note lessons live on AP Groups Hub

30
previous-year papers loaded across our platforms

EN + any
language, in every question, option and solution

VIDEO LESSONS & LIVE CLASSES

Teach on video. Go live. Sell it all on one platform.

Your recorded lessons and live classes sit right next to your tests and notes, on the website and in the app, behind the same student login and the same passes.

HOW A LIVE CLASS WORKS

1 · Schedule
Date, time (IST), duration and your Zoom / Meet / YouTube Live link

2 · Announce
Students see it under "Live classes" with the time

3 · Join
Join button opens 15 minutes before, only for students with access

4 · Recording
Paste the recording; it plays like any lesson

Courses & lessons

Group videos into courses (a subject or a batch), set the order, and keep drafts hidden until ready.

Paste a link, it plays

YouTube (unlisted works), Vimeo or MP4 files. YouTube plays in privacy mode with no related-video clutter.

Free samples, paid courses

Mark any lesson free to attract students; the rest unlock with the course's pass.

Links stay private

Locked lessons never send their video or meeting link to the browser, so they can't be shared from the page.

"Live now" on time

The page refreshes itself every minute, so the Live badge and Join button appear without reloading.

Any language

Course and lesson titles and descriptions in English and your students' language, with a language switch.

One place to learn: watch the lesson, read the notes, take the test, see the solution, then join the live doubt class.

ADMIN PANEL

Your team runs everything from one panel.

A separate, secure admin website for your staff. Students never see it, and only admin accounts can sign in.

HOW A TEST GOES LIVE

1 · Import
Upload questions with checks and preview

2 · Tag
Subject › chapter › topic, difficulty

3 · Publish
Each question gets a locked version

4 · Build
Sections, timing, marking, access

5 · Release
Free, paid or on a set date

Question import

Standard question format with automatic validation, a preview with answers and solutions, and grouped questions for passages.

Question bank

Single and multiple choice, numeric, text and descriptive questions; easy, medium and hard; searchable by topic.

Safe editing with versions

A published question is never changed in place. Fixes create a new version, so past results stay correct.

Test builder

Timed sections, marks, negative marking, retake and review rules, free / paid / pass access.

Business dashboard

Sign-ups, active students, engagement, leads and scorecards at a glance.

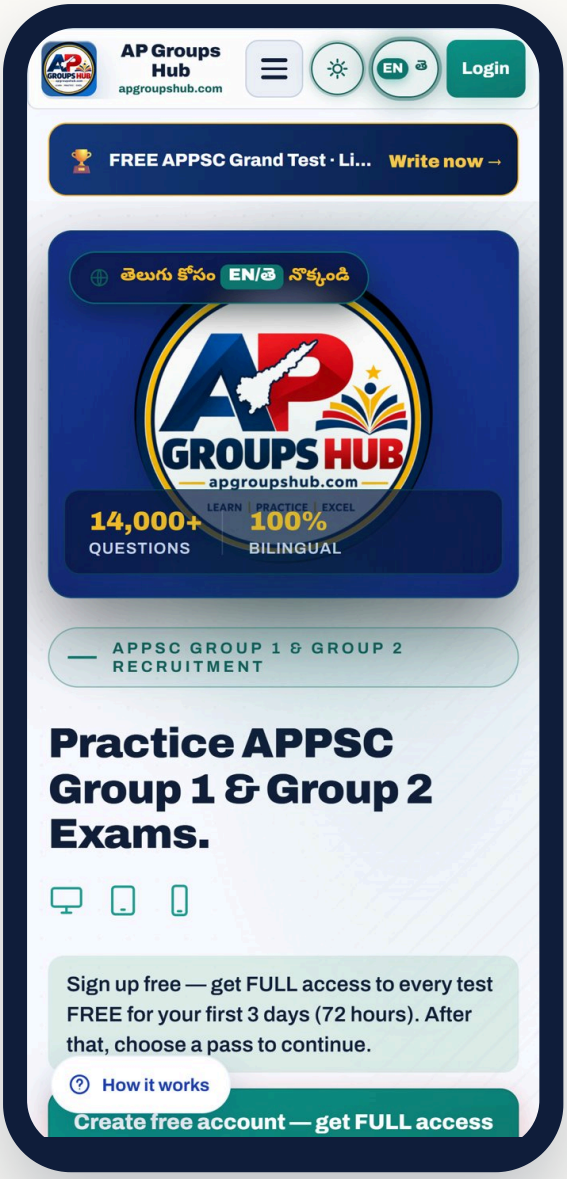

Students & payments

Search and manage students, block misuse, and sell passes online through Razorpay.

Every admin action is recorded in an audit log, so you always know who changed what.

ANDROID APPLICATION

Your institute, in every student's pocket.

Published on Google Play under your name

Your app name, icon and listing. We handle the build, signing and Play Store submission.

One account, web and app

Students sign in once, with Google or email, and see the same tests, results and passes everywhere.

Distraction-free exam mode

Navigation bars hide during a test, review and instructions, and the back button is handled safely.

Your content stays yours

Screenshots and screen recording are blocked in the app; printing is blocked on the website.

Instant updates, no store wait

New screens and fixes reach every phone over the air. Each update is digitally signed (RSA-4096), rolls back by itself if anything fails, and is never applied in the middle of a test.

One codebase

website and app built from the same code, so they never drift apart

Native sign-in

Google sign-in inside the app, without opening a browser

Secure by default

HTTPS only, debugging switched off in store builds

MARKETING & GROWTH

A platform that brings students in, not just one that waits for them.

₹7.54
per student lead

Real result, AP Groups Hub, October 2026: our Meta lead-form campaign brought 80 student leads at ₹7.54 each, delivered straight into a shared call sheet for the counselling team.

Meta Pixel + Conversions API

Sign-ups, checkouts and purchases reported from the browser and from our server, so Facebook and Instagram ads learn who your real buyers are.

Google Ads tracking

Conversion tag for sign-ups, ready for Google Search campaigns on your exam keywords.

Lead forms → call list

Ad leads and new sign-ups sync automatically into a Google Sheet your team calls from.

Privacy-friendly analytics

Self-hosted, cookie-free analytics with a sign-up funnel and source tracking for every campaign link.

Found on Google

Every public page is pre-built for search engines and AI assistants, with sitemap and rich previews.

Social media content

Instagram carousels and Reels in your students' language, YouTube Shorts, Facebook, Telegram and WhatsApp Business setup.

Built-in growth tools: a free sample test without sign-up, free trial passes and referral rewards turn visitors into paying students.

FAST, DYNAMIC & BUILT TO SCALE

Light enough for a budget phone on mobile data. Built to grow with you.

31.7 KB
code downloaded to open the live exam screen (compressed)

112 KB
to start the whole site; each screen loads only when opened

On demand
maths and chart engines load only when a question needs them

HOW IT IS BUILT

Student website
React, pre-built pages

Android app
Same code, native shell

Admin website
Separate, staff only

↓ secure HTTPS gateway ↓

API server
Node.js 24, TypeScript, scoring and access

PostgreSQL 16
Students, tests, results

File storage
Question images and diagrams

Scales part by part
Website, admin, server and database run as separate containers, so the busy part grows without touching the rest.

Tested on every change
297 automated test files; type checks, lint, tests and build run before every release.

Protected
Rate limiting, secure session cookies, hashed reset codes and strict admin/student roles.

New exam? Configure, don't rebuild
Questions are exam-neutral. Tests decide the exam, sections, timing and rules, so one bank serves many courses.

Safe database growth
All changes go through tracked migrations; nightly backups kept 14 days, with restore checks.

Actively developed
483 recorded code updates in our codebase so far, and counting.

TECHNOLOGY, SPEED & DATA

Modern technology, tuned for speed on every phone.

The same care goes into the website and the Android app: small downloads, instant screens, safe data and a codebase our engineers improve every day.

WEBSITE React 19 · TypeScript · Vite	**ANDROID APP** Capacitor 8 native shell	**API SERVER** Node.js 24 · TypeScript	**DATABASE** PostgreSQL 16 · Prisma 7
CACHE Redis 7	**FILES** S3-compatible storage (MinIO)	**GATEWAY** Caddy HTTPS · zstd/gzip	**DELIVERY** Cloudflare network · Docker

Website speed

- Pages pre-built for instant first load and search engines
- Each screen downloads only when it is opened
- Maths and chart engines load only when a question needs them
- Compressed (zstd/gzip) and served over a global network
- Works on budget phones and slow mobile data

Android app speed

- The app's screens are inside the app, so it opens without downloading the site
- Fonts are built in, so text is sharp even offline
- Instant updates in minutes, without waiting for store review
- Updates are signed, roll back on failure, and never land during a test
- Native full-screen exam mode and safe back button

Codebase

- One TypeScript codebase for website, app, admin and server
- Website, admin and server kept strictly separate
- Shared, typed contracts between app and server
- Small focused modules, not giant files
- Type checks, lint, automated tests and build on every change

Database & data

- PostgreSQL with every change made through tracked migrations
- Published questions are versioned, never edited in place
- Scores, ranks and analytics calculated on the server
- Answers saved continuously, with automatic retry on weak networks
- Nightly backups kept 14 days, with restore checks

Scale

- Website, admin, server, database, cache and files run as separate containers
- Background worker for heavy jobs such as scoring
- Add capacity to the busy part without touching the rest
- Health and readiness checks on the server

Security

- HTTPS everywhere
- Rate limiting and secure session cookies
- Strict admin and student roles, audit log
- Screenshots blocked in the app; printing blocked on the website
- Reset codes stored only as hashes

FOR SCHOOLS · VIDYALAYA EARLY ACCESS

One platform a whole school runs on, built to protect children.

A school management and learning platform in English, Telugu and Hindi. It joins our tested exam engine with everything a school does every day, from admission to report card, with each school's data fully private to that school.

A SEPARATE PORTAL FOR EACH ROLE

Principal
Admits students, runs the school, sees the full family record and oversees messages

Teacher
Attendance, marks, homework and messages with parents

Parent
The one family login: timetable, attendance, marks, homework, fees and messages

Accountant
Fees, invoices, payments and staff payroll

Staff
Marks their own attendance and messages the principal

What makes it different: children never get an account

A student is a school record, not a login. The parent's account is the family's single login, and everything reaches the child through the parent. A child who has no account is never tracked, profiled or shown ads. This is the safest way to handle minors' data under India's DPDP Act 2023.

Parent consent recorded

Parents activate their account with Google sign-in or a set-password link, and their consent is recorded.

Parents see only their children

Access is checked in the database layer itself, not just hidden on screen.

Private messages, encrypted

Message text is stored encrypted (AES-256-GCM). Parents' contact details are hidden from staff.

Less data kept

Only a small, necessary student record is stored, and old sign-in details are erased automatically every day.

Every important change logged

Admissions, fees, calendar and people changes are recorded in an audit log.

Safe by default

Secure session cookies, encrypted passwords, and a server that refuses to start without its security keys.

Built for Telangana and Andhra Pradesh SSC schools first, including CCE / FA–SA assessment and SSC grading. Schools can book a demo and early access now.

VIDYALAYA · INSIDE THE PLATFORM

Everything a school office, teacher and parent needs.

Each part below is a working module of the school platform, designed around how Telangana and Andhra Pradesh schools actually run.

Admission in one step
Student record, parents, class, fee plan, first invoice, consent request and parent invite, all saved together or not at all.

Attendance register
Monthly grid of dates and students: present, absent, late, half-day, excused, plus the school holiday calendar.

Gradebook & progress report
Unit tests to annual exam, SSC A1–E grades, pass mark 35%, rank against class average in each subject.

Homework
For the whole class or one student, spread on a calendar, with done / not-done tracking both ways.

Fees
Fee structures by class, with changes for individual students, invoices and payments.

Leave & payroll
Student and staff leave; an approved student leave is marked “excused” in attendance automatically. Staff payroll.

Staff self check-in
Each staff member marks their own attendance from their own login; nobody marks it for them.

Messages
Gmail-style threads: parent ↔ teacher, parent ↔ principal, principal ↔ staff, with a contacts list and the principal's oversight archive.

360° people view
The principal sees a student with every parent's contact details in one place.

Tests & chapter notes
Our computer-based test engine with topic-wise mastery analysis, and chapter notes with practice questions.

Three languages
English, Telugu and Hindi on every screen; a missing translation is caught before release.

Same strong technology
TypeScript, React, Node.js and PostgreSQL, with tracked database changes, the same as our exam platforms.

Made for your school: like everything we build, Vidyalaya is set up in your school's name and brand, changed as you need, and supported 24×7.

CUSTOM-BUILT, FULLY MANAGED

Built only for you. Looked after by us, every day.

We do not hand you a ready-made app that every institute shares. Our specialist team designs and builds your website and app around your institute, then maintains, upgrades and changes it as you need, every day, 24×7.

HOW WE WORK WITH YOU

1 · Understand
Your courses, students, way of teaching and goals

2 · Design
Screens, colours and flows made for your brand

3 · Build
Only the features you need, plus anything special

4 · Launch
Your website and your own Play Store app

5 · Care, 24×7
Daily changes, upgrades and support

Designed for you, not a template

Your own look, your own screens and your own features. No two of our clients get the same application.

Your own website and app

Your domain, your Play Store listing and your own separate set-up, with your students' data kept only for you.

Changes every day

Ask for a new feature, a change or a fix. We build it and put it live, on the website and in the app, without waiting for store review.

Available 24×7

Call or WhatsApp us any time. We watch your site and app around the clock and step in before students notice a problem.

Maintained and upgraded

Security updates, new Android versions, Play Store rules, backups and speed tuning are all handled by us.

A specialist team

Exam design, question content, design, development and marketing experts working as one team for you.

See it in your own brand: we can prepare a demo with your institute's name and colours and walk you through it. Call +91 83093 90436.

READY TODAY, AND BUILT TO ORDER

Start with what is ready. Add anything else you need.

Everything on the left is already running for our own students. Anything on the right, or anything else you think of, our team designs and builds for your institute.

WHERE WE ALREADY LEAD

A real exam screen, just like the actual exam · scores worked out on our servers, not the phone · rank, percentile and topic-wise analysis · English plus any regional language · instant app updates without a Play Store wait · full ad and sign-up tracking (Meta, Google)

Included today

✓ Your own branded website and web address
✓ Your own Android app, screenshots blocked
✓ Computer-based tests with sections, timers and negative marking
✓ Results, rank, percentile and analysis
✓ Question bank with bulk import and versions
✓ Test series with dates, free and paid tests
✓ Step-by-step solutions with formulas, tables and charts
✓ Study notes in English and your students' language
✓ Recorded video lessons and courses
✓ Live classes (Zoom, Meet, YouTube Live) with recordings
✓ Online payments and passes (Razorpay)
✓ Free trials and referral rewards
✓ Admin panel, student roster and daily reports
✓ Meta Pixel, Google Ads and analytics
✓ Backups, HTTPS and secure logins

Built to order for your institute

+ Teachers and staff logins, each limited to their own batches
+ Batches with timetables and enrolment
+ App notifications, announcements and WhatsApp class reminders
+ Fee collection: instalments, receipts and due reminders, with money paid straight to your account
+ Course store with bundles, coupons and GST invoices
+ Secure video hosting with a student watermark
+ Attendance for live and offline classes
+ Assignments and homework with marking
+ Doubt threads with teacher replies
+ Certificates on completion
+ Parent access to progress
+ iPhone app

Your requirement, our job: tell us how your institute works, and we shape the website and app around it, then keep improving it every day.

FEATURE CHECKLIST

Everything included, down to the details.

Exam screen

Subject tabs · overall and section timers · question palette (not visited, not answered, answered, marked) · mark for review & next · save & next · skip section · submit with confirmation · text-size setting · language switch (English + any language) · marks and negative marking per section · two-page instructions with declaration · answers saved continuously and before time runs out · retake and review rules per test

Results & analytics

Score · attempted · correct · incorrect · skipped · unseen · accuracy · total time · rank and percentile · top score and gap from top · rank on first, best or latest attempt · top-10 board per test · subject and topic strengths and weaknesses · speed and difficulty analysis · retake improvement · attempt history · scores calculated on the server

Solutions & content

Question-by-question review · step-by-step solutions · maths formulas · tables · bar, line, pie, radar and mixed charts · images and diagrams · reading passages · study notes linked to weak topics · previous-year papers as timed tests · Beginner and Expert tracks · dated test series with syllabus · free sample test without sign-up

Video & live classes

Courses with ordered lessons · YouTube, Vimeo and MP4 · YouTube privacy mode · live classes with date, time and duration · Zoom, Meet or YouTube Live links · join opens 15 minutes early · recording added after class · free sample lessons · pass-locked lessons · private links never exposed · auto-refreshing "Live now" · drafts and archive

Students, login & payments

Google sign-in on web and app · email and password · forgot password by email · one account across web and app · passes per exam group plus combo · Razorpay online payments · access granted only after payment is confirmed · free trial passes · referral rewards · help for students opening links inside Instagram or WhatsApp

Admin panel

Question import with validation and preview · question bank (single and multiple choice, numeric, text, descriptive; easy, medium, hard) · subject › chapter › topic tags · locked question versions · test builder · free, paid or dated release · video and live-class manager · business dashboard · student roster with CSV export · daily sign-up scorecard · activity and leads · engagement · block and unblock accounts · audit log

Android app

Play Store listing under your name · same login as the website · native Google sign-in · full-screen exam mode · safe back-button handling · screenshots and screen recording blocked · digitally signed instant updates · automatic rollback if an update fails · updates never applied during a test · HTTPS only

Marketing & growth

Meta Pixel · Meta Conversions API from the server (lead, checkout, purchase) · Google Ads conversion tag · cookie-free self-hosted analytics with sign-up funnel · campaign source tracking on every link · search-engine-ready pages, sitemap and rich previews · AI-assistant summaries (llms.txt) · lead forms synced to a call sheet · WhatsApp button · social media content in your students' language

Security & operations

HTTPS everywhere · rate limiting · secure session cookies · reset codes stored only as hashes · strict admin and student roles · printing blocked on the website · nightly database and file backups kept 14 days · restore checks · Docker deployment · automatic checks on every change · 297 automated test files

WHY OUR CODE IS DIFFERENT

1 **Built from real exam operations**
Every feature exists because our own students needed it. You get a platform proven in production, not a template.

2 **Questions and tests are kept separate**
One bank of exam-neutral questions powers many courses; tests decide the exam, timing and rules.

3 **Results you can trust**
Versioned questions and server-side scoring mean marks and ranks never change behind a student's back.

4 **Any language, by design**
English plus Telugu, Hindi, Tamil, Kannada, Marathi or any language your students study in: every question, option, solution and screen, not a translation bolted on later.

5 **Exams, marketing and support in one partner**
Software, content, Play Store, ads and analytics from one team. No five vendors to manage.

How we work with you

1 · Discuss	2 · Design	3 · Content	4 · Launch	5 · Care 24×7
Your exams, students and goals	Custom screens in your brand	Questions, notes, papers loaded	Website and Play Store app	Daily changes, upgrades, growth

Let’s put your coaching institute online. Book a free demo.
